

SK AKRAM AHMED

Hyderabad, India | shaikakram4684@gmail.com | +91 6303548192 | [LinkedIn](#) | [GitHub](#)

Professional Summary

Full Stack Developer with strong knowledge of Java, JavaScript, React.js, Node.js, Express.js, SQL, and MongoDB. Experienced in designing and developing responsive web applications, RESTful APIs, and scalable backend systems. Hands-on experience in security operations, phishing investigations, and secure software development. Proficient in data structures, algorithms, object-oriented programming, Git, and database design. Passionate about building high-performance, secure applications while following software engineering best practices and Agile methodologies.

Education

B.Tech in Computer Science Engineering

2024 – Present

Vardhaman College of Engineering | CGPA: 8.85

Diploma in Computer Science Engineering

2021 – 2024

Kshatriya College of Engineering | CGPA: 9.33

Projects

Multimodal Fake Product Hype Detection System [↗](#)

- Developed an end-to-end multimodal machine learning pipeline combining TF-IDF, BERT embeddings, anomaly detection, and behavioral modeling to fuse text, temporal, and reviewer signals into an explainable Hype Score for detecting artificially inflated product ratings on Amazon and Yelp datasets.
- Designed a modular, configuration-driven system architecture featuring a 9-stage data pipeline, SHAP model explainability, OAuth-secured authentication, an interactive Streamlit dashboard, and automated research report generation.

Wanderlust — Travel Listings Application [↗](#)

- Developed a full-stack travel listings application using Node.js, Express, MongoDB, and Mongoose with complete CRUD functionality and RESTful route architecture.
- Built server-side rendered views using EJS templating and implemented method-override middleware to support PUT and DELETE requests via HTML forms.
- Designed a Mongoose data model for listings and created a database seeding script for sample data initialization.

Professional Experience

Trainee — Mass Mutual, Hyderabad

2025

- Conducted phishing investigations by analyzing email headers, SPF, DKIM, DMARC, malicious URLs, and encoded content to identify and validate email-based threats.
- Utilized CyberChef, VirusTotal, MXToolbox, WHOIS Lookup, and AbusIPDB to analyze Indicators of Compromise (IOCs), perform threat intelligence analysis, and verify email authenticity.
- Investigated real-world phishing scenarios and recommended security controls to strengthen email security, improve threat detection, and support incident analysis.

Technical Skills

Core Languages : OOPS, DBMS, Computer Networks, Operating System.

Languages: C, C++, Java, JavaScript, Python, SQL.

Frontend: HTML5, CSS3, Bootstrap, React.js, EJS.

Backend: Node.js, Express.js, REST APIs.

Databases: MongoDB, MySQL.

Tools & Platforms: Git, GitHub, VS Code, AWS (EC2, S3), MySQL Workbench.

Certifications & Achievements

- MassMutual India – Certificate of Appreciation: Successfully completed a phishing investigation case study under the AIDEA program, demonstrating practical skills in email security, threat analysis, and phishing detection.
- AWS Academy Graduate – Cloud Foundations: Gained knowledge of AWS cloud services, cloud architecture, security, networking, and pricing models.
- AWS Academy Graduate – Data Engineering: Acquired hands-on experience with AWS data pipelines, data lakes, ETL processes, and analytics services.
- Professional Certification in Cybersecurity: Covered cybersecurity fundamentals, threat analysis, network security, vulnerability assessment, and security best practices.
- Cambridge Linguaskill Certification: Certified in English communication, reading, listening, and comprehension with professional language proficiency.
